### **DETAILED ACTION**

Applicants' arguments, filed March 21, 2006, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous Office Actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

#### ***Informalities***

Claims 1-6 are currently pending and are the subject of this Office Action.

#### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory

Art Unit: 1614

double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-6 provisionally rejected on the ground of nonstatutory double patenting over claims 1-8 of copending Application No. 09/792,898. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

Applicant's arguments filed March 21, 2006 have been considered but are not persuasive. Applicant has argued that the Office placed the requirement to restrict the compounds of the two co-pending applications. However, Applicant has amended both applications such that the pending claims of each are drawn to the same compounds.

Thus, the Provisional Double Patenting rejection of Claims 1-6 is appropriate and maintained.

### ***Claim Rejections - 35 USC § 112 – Written Description***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 6 recites the limitation "wherein said alpha-pyrone compound " in Line 1. There is insufficient antecedent basis for this limitation in the claim. Claim 6 depends on Claim 1 which was amended by the applicant to recite the limitation "kavapyrone".

Art Unit: 1614

Thus, there is insufficient antecedent basis for the limitation "alpha-pyrone" in instant Claim 6.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 rejected under 35 U.S.C. 103(a) as being unpatentable over Fujiki for the reasons stated in the Office Action dated October 26, 2005. Applicant's arguments filed March 21, 2006 have been fully considered but they are not persuasive. Examiner agrees with Applicant that the Fujiki reference focuses on the cancer prevention effects of green tea. However, the reference also discloses a report of unusually low rates of many cancers in Fiji (page 595, left column). Fujiki then goes on to discuss that people in Fiji drink kava and he speculates that this may be the reason for the low incidence of many cancers in Fiji. Further, the reference states that they are "now studying whether kava lactones can inhibit cancer development" in rodent carcinogenesis experiments.

Applicant has argued that Fujiki does not disclose that kava reduces the incidence of cancer. This argument is not persuasive. The 35 U.S.C. 103 rejection is based on the obviousness of the present invention. Given the teachings of the Fujiki reference, it would have been obvious to one of ordinary skill in the art at the time the

Art Unit: 1614

invention was made to explore the use of kava extracts in the inhibition of cancer development.

Applicant argues that his Declaration under 37 C.F.R. 1.131 provides evidence that Applicant began work on kava and cancer incidence in November of 1997. No such Declaration has been filed in this application.

Thus, the rejection of Claims 1-6 under 35 U.S.C. 103(a) is maintained.

### ***Conclusion***

No claims are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
